

Create an account at:

<https://www.icmarkets.com/global/en>

If you don't have a demo account, follow these instructions:

Scroll down to demo accounts and press "OPEN DEMO ACCOUNT"

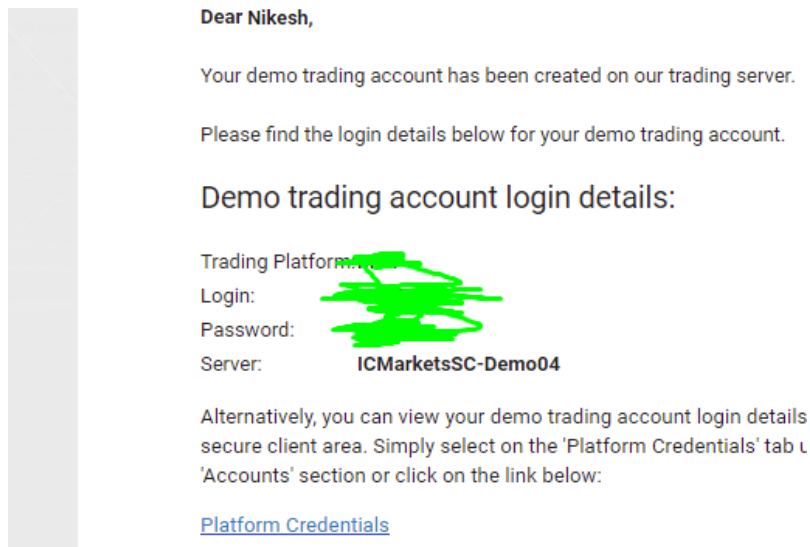

Press proceed.

OPEN A NEW DEMO ACCOUNT

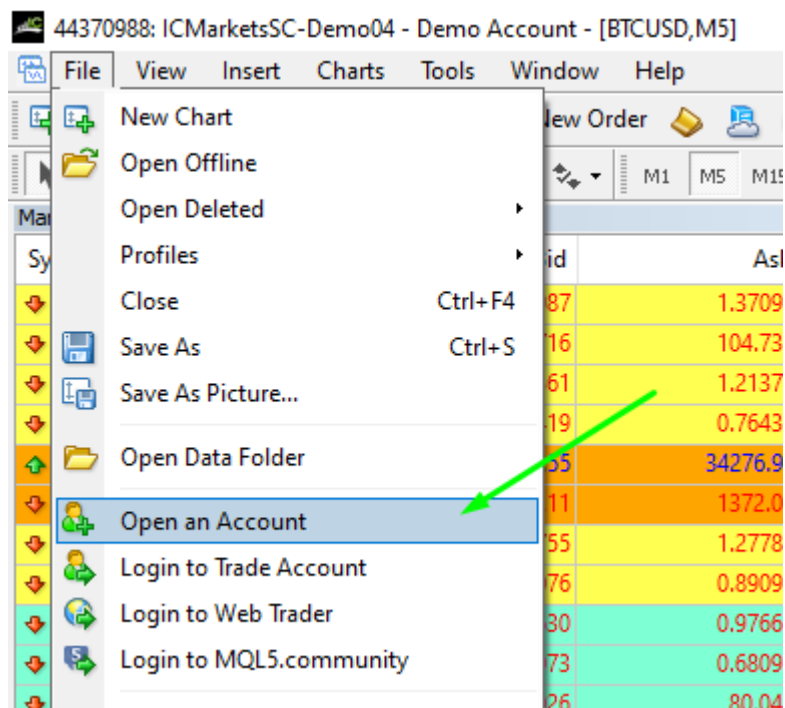

To open a demo trading account you must complete the form below nominating your trading platform, account type, currency, leverage and initial deposit amount. Once complete an email with your demo trading account login details will be automatically sent to you. Please remember to check your email.

Trading Platform:	<input type="text" value="MT4"/>
Account Type:	<input type="text" value="Raw Spread"/>
Currency:	<input type="text" value="USD"/>
Leverage:	<input type="text" value="1:500"/>
Initial Deposit:	<input type="text" value="200"/>
<input type="button" value="PROCEED ►"/>	

You will get the login information sent to your email:

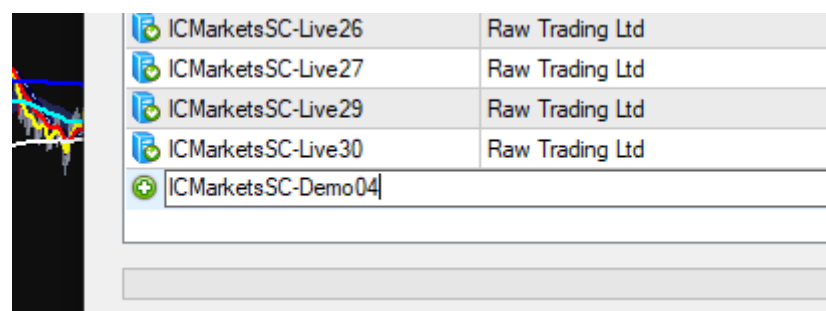

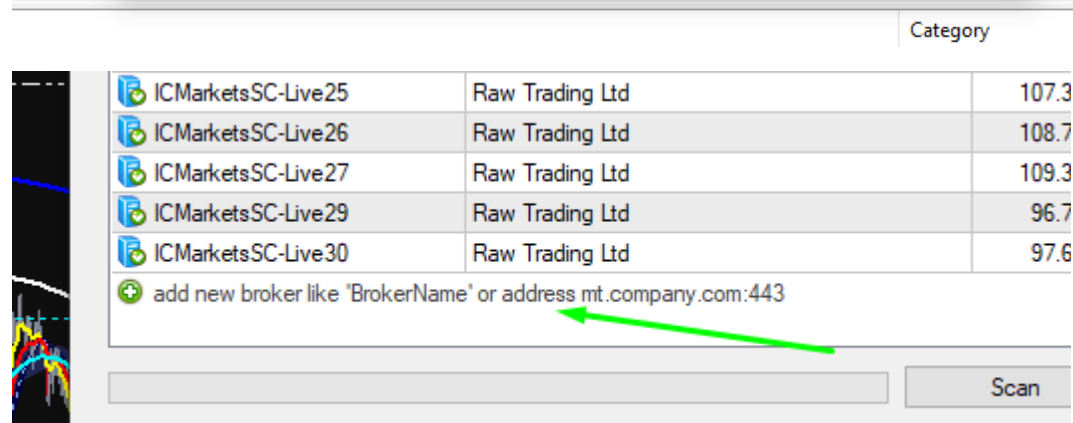

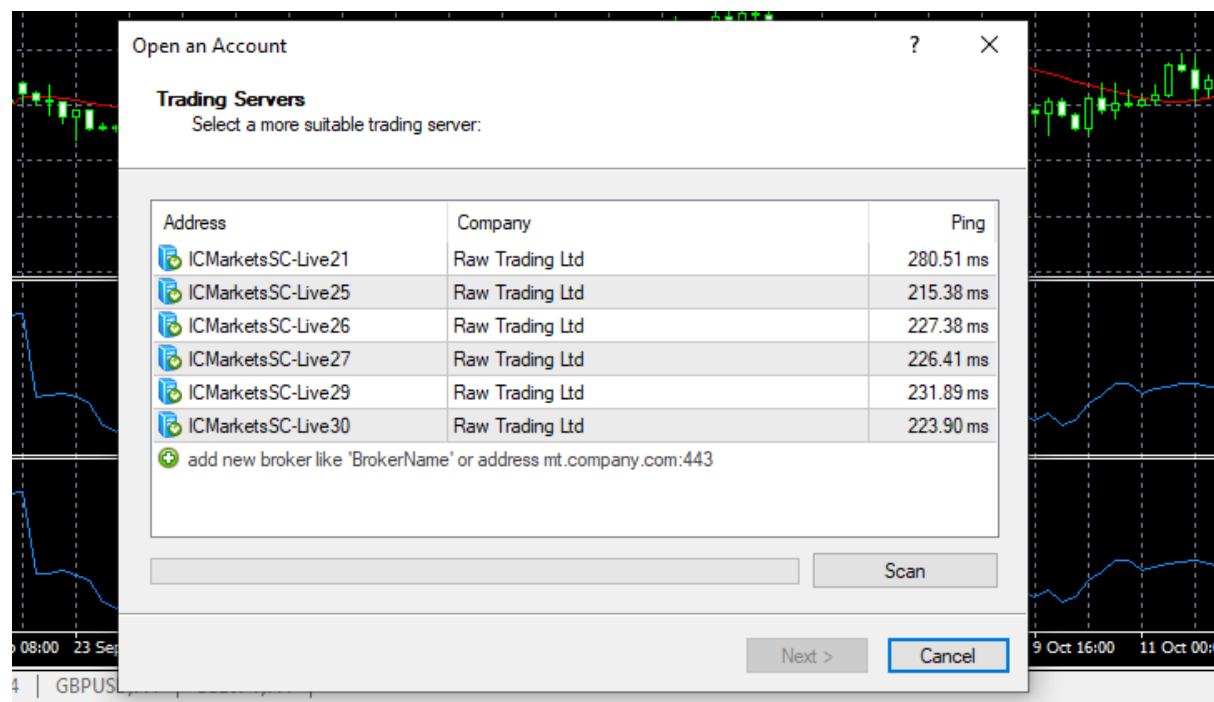

Once you have downloaded mt4, you have to login

Click on **File – Open an Account**

If you don't see the demo servers, you must add it manually.

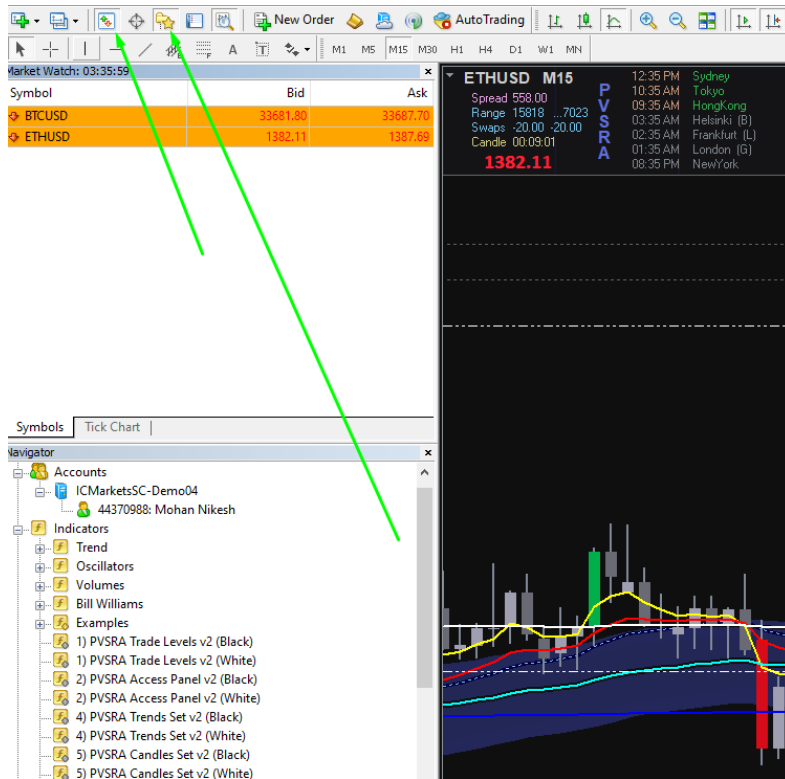

Press **ENTER**.

You will now get the option to login. Write your login information and you should be set.

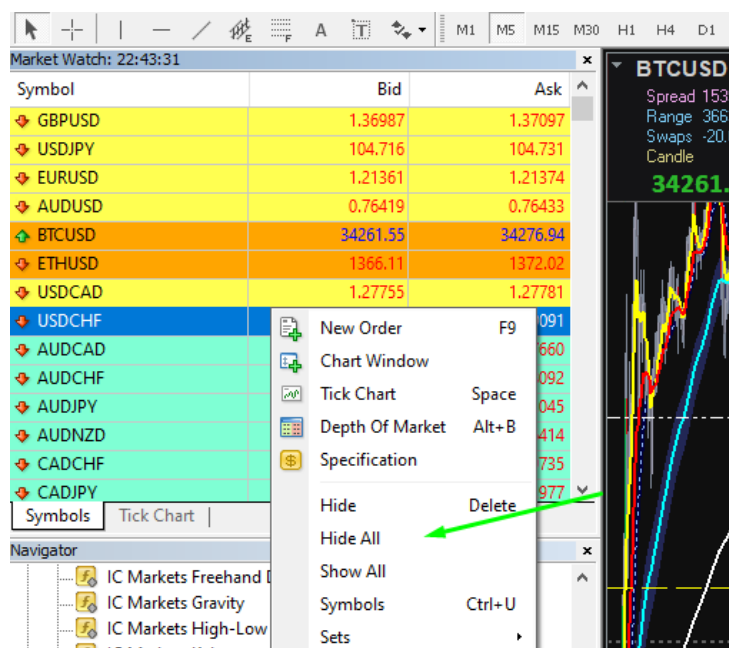

Now to add the crypto charts to “Market Watch”:

You can hide/show these tabs by clicking the buttons.

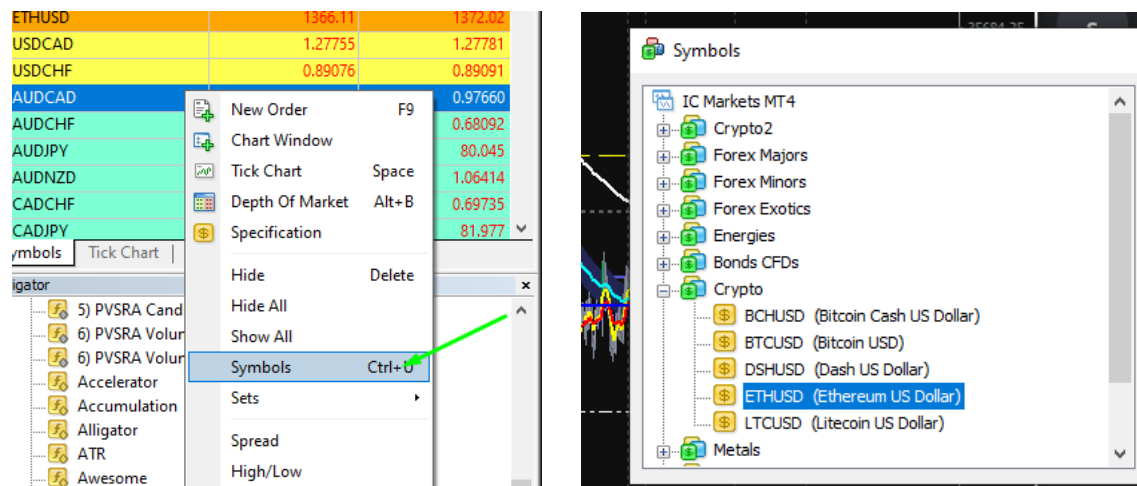

“Market Watch” to the left, and “Navigator” to the right.

First I recommend hiding charts you won’t be using. Right click on “**Market Watch**” and press “**Hide all**”.

Then click on “**Symbols**” to get a view of all available charts. Here you should see “**Crypto**”:

Add the one's you want.

To add the indicators, you can follow Tino's tutorial.

https://youtu.be/rH_rRoiaq9s?t=1326

Starts at around 22 min. Indicators will be in the discord. Hope this helps.
